About This Game

Boss is out on some business trip and this means only one- it's time to begin competition for the title of the Fastest Corporate Robot in the office! The courses are ready and an overly enthusiastic office mob is craving for some action! Prepare yourself for a merciless rivalization and great emotions!

Race or die!

Key Features:

- Race on 15 unique and demanding tracks full of various obstacles and (mostly dangerous) surprises.

- Compete against AI or try to win crazy hard time trials.

- Call forth your real-life friend to help you win the race or crush him down on your favorite track.

- Make good use of wondrous gizmos cooked up by some office wizz.

- Beware! Office is a demanding place even for the experienced participants of a corporate rat race. Will you manage to end up in one piece?

- Hardcore achievements sure to put you on your toes for many hours. Developers don't take responsibility for broken keyboards and broken hearts. Will you accept this challenge?

- Win gold medals and collect fabulous skins for you and your precious chair.

- Countless cardboard boxes litter the whole office. How deadly a little bit of cardboard can possibly be?

Office Race is a demanding game only for **true players**. Levels created by some black-hearted psycho combined with questionable maneuverability of office chairs are going to squish a small flood of sweat out of you.

It's a contradiction!

I love this map, just about as much as I love other OMSI maps. Ok, so there are some low-res textures on the buildings, but if you set that (and the odd bug, but that's to be expected) aside, it's a lovely area to drive around. There are an adequate amount of long-ish routes, but the hotel shuttles make up for this - there's loads of them, around 20/30 I'd say! You have to remember that the developers put a lot of time and effort into this. \u00a327 may be a bit pricey, but I got it for that and play it all the time - I think it's worth it! By the way, I haven't even been to Mallorca before!

Overall score: 9/10. Prepare for a Click Fest! Rest your arm and get that digit finger ready for the strain!

5 hours and its completed, didn't rush either. Needs a bit more features, very repetitive and The CEO can go Screw herself!

If you want a really satisfying view on how it plays, check this guy out <https://www.youtube.com/watch?v=LuQVJv3y7aM>
[If you Have \u00a338.99 to throw away, check it out but don't expect time dilation :\)](#)

[Hint: Enable swear mode to make it that Tiny little bit more exciting. Good old classic.. This game is a game.. It's a shame we don't have many servers running for this stunning mod.. https://youtu.be/VRziXwHyvE0g](#)

[After the initial system shock wears off there is a lot of juicy meat on this hybrid space management / conquest / diplomacy game. The combat combos add an appreciated extra level of depth.](#)

[Note: This version was replaced by the 'Lightspeed Edition'](#)

https://store.steampowered.com/app/651660/Halcyon_6_Starbase_Commander_LIGHTSPEED_EDITION/. A charming little adventure following Frog Detective's deeply philosophical and seat-gripping adventure on a haunted island (Lobster Cop is still not available). For those familiar with Grace Bruxner's other work, this is a lovely, fleshed out addition to the growing collection - to those uninitiated, welcome to your new fan club. Honestly, it's worth the small asking price for the chance to judge The Competition alone.

[10/10 GOTY. i do like gta 4 and this but WHY DOSE IT NEED THE XBOX PROGAM TO WORK? and when i insaled this it just \u2665\u2665\u2665\u2665ed me right up the\u2665\u2665\u2665\u2665. Now let me start off by saying I am a huge fan of this genre \(visual novel w/ RPG elements\) and of the developer, Winter Wolves. However, I cannot recommend anyone this game unless it is on sale. It seems that as the developer starts chugging out more games per year, the quality of them keeps dropping. None of his latter installments can stand up to the original Loren The Amazon Princess.](#)

Pros:

Artwork (decent; not as good as previous games)

Good soundtrack

Diverse and distinctive characters.

Cons:

The writing is so bad. It's bland at best, atrocious at worst.

The plot makes little sense, while the ending is very rushed.

The gameplay is repititive; even more so than the one of Amber's Magic Shop, a crafting game with no combat system, and that says something.. Worth \$10, but I can't support false advertising.

[The devs made it so the community could create content and then apparently abandoned the game. Not a word for six months, no real content update for over a year. It makes sense I suppose, let the community prop up the game to promote sales while halting the costs of development, but what they should have done is stop advertising the game as if it's in development when it apparently isn't.](#)

It's a nice and good game, a lot like hearthstone, but there are some things about it that aren't that great.

To start I played this game on my phone at the start of the year, since I had an iPhone 4 it didn't really run that great and I quit pretty soon.

You can see that this really is a mobile port and it needs some fixing for compatibility with pc.

- energy reloading over time

This is NOT a common pc feature this really is a mobile feature and I think it needs to be removed.

- Dragging

You need to drag the bar to the left/right to see all the cards, again a mobile feature NOT a pc feature

- Hand for tutorial

You see a hand if you need to press on stuff, pls make this a mouse or something.

that's that, I'd still recommend it 7/10. I can still remember the hundreds of hours spent on exploration Aventuria in the early nineties. Amazing experience. That is why I decided to purchase the whole trilogy and create a perfect team to go through the beautiful world. I would recommend this game to anyone, especially the younger players, I want you know that once really good games were made and the amazing graphic is not everything.. Don't Buy ,

Positive : Bird sound

Negative : all the game

. A great game even after all these years since being released. A+. You get what you paid for, 4K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements.. not good, just the creator not the game. Unplayable in 2019 due to GFWL integration. Do a credit card chargeback.
